

California Child Welfare Services
Outcome & Accountability County Data Report
(Child Welfare Supervised Caseload)
Orange
October 2005

Quarterly Outcome and Accountability County Data Reports published by the California Department of Social Services (CDSS) provide summary level Federal and State program measures that will serve as the basis for the county self-assessment reviews and be used to track State and county performance over time. It is important that counties not draw comparisons to performance in other counties or even the State as a whole due to the differences in demographics, resources, and practice. The intent of the new system is for each county, through their self-assessment review based on their data, to determine the reasons for their current level of performance and to develop a plan for measurable improvement.

Assembly Bill (AB) 636 requires a series of measures that provide indicators of key program outcomes, processes, and receipt of critical services. The outcome measures are also, at a minimum, consistent with those outcomes of the federal Child and Family Services Review in that the federal indicators are a subset of the State's indicators under this new system. Under the new Outcomes and Accountability System it is expected that the state will not only improve its performance on the federal indicators but on an even broader set of state enhanced indicators. The data in this report focuses on critical safety, stability, family, and well-being measures that are currently available, and that are provided to counties for on-going assessment of their programs' performance. **New data are added and some old data have been updated in this report. The data in this report reflect the Original outcomes for data available through April 1, 2005. We have also included Updated (refreshed) data for some time periods, run on data from more recent extracts than those that were originally posted. Differences between the Original and Updated values for these measures are probably due to data cleanup efforts in some counties. Uniform Resource Locators (URLs) included in this document direct the viewer to summary data across counties and breakouts by age, race, gender, and over time, including refreshed data for time periods earlier than those included in this report for all UCB developed measures.** This Outcome and Accountability County Data Report will provide the state with a county-by-county detailed description of each element that comprises the service delivery system.

The data source for these reports is the Child Welfare Services/Case Management System (CWS/CMS), which became fully operational in all 58 counties on December 31, 1997. Counties are responsible for inputting data on CWS/CMS as part of their process to manage their caseloads of children and families who receive child welfare services. The accuracy of the information derived from CWS/CMS is continuously improving. As with any large automation system it provides a broad range of challenges and benefits as it continues to undergo improvements to keep abreast of the changing child welfare system.

Comparison of data across counties should be done with caution. First, counties may have different data management practices. Though data are recorded on one statewide database system (CWS/CMS), differences in data entry and update may influence outcome measures reported here. Second, the social and economic contexts within which child welfare services are provided vary widely among the 58 counties of California.

In this report data measures have been grouped into the four general categories of information: Child Welfare Services Participation Rates; Safety Outcomes; Permanency Outcomes; and Child and Family Well-Being Outcomes. The data for these categories are presented as follows:

CHILD WELFARE SERVICES PARTICIPATION RATES

This section provides data on the number, and number per 1,000 children in the county/state, for key child welfare indicators. It is intended as background information to assist your county in analyzing your county's performance by the outcome indicators. This section was developed by the University of California, Berkeley (UCB).

SAFETY OUTCOMES

These measures are designed to reflect the effectiveness of efforts to protect children from abuse/neglect by reporting instances of abuse and neglect at various stages of child welfare services and process measures which reflect the frequency of social worker contact with children and the speed of face-to-face investigation of abuse/neglect allegations.

Recurrence of Maltreatment (1A and 1B)

This measure reflects the percent of children who were victims of child abuse/neglect with a subsequent substantiated report of abuse/neglect within specific time periods. It is both a state and federal outcome measure. This measure was developed by UCB.

Federal: Of all children with a substantiated allegation within the first six months of the 12-month study period, what percent had another substantiated allegation within six months? (limited to dispositions within the study year, according to federal guidelines).

Rate of Child Abuse and/or Neglect in Foster Care (1C)

This measure reflects the percent of children in foster care who are abused or neglected while in foster care placement (currently limited due to data constraints to children in foster or FFA homes). This data was developed by UCB. It is a federal outcome measure.

For all children in county supervised or Foster Family Agency child welfare supervised foster care during the nine-month review period (timeframe established according to federal guidelines), what percent had a substantiated allegation by a foster parent during that time?

Rate of Recurrence of Abuse and/or Neglect in Homes Where Children Were Not Removed (2A)

This measure reflects the occurrence of abuse and/or neglect of children who remain in their own homes. This data was developed by CDSS. It is a state outcome measure.

Of all the children with allegation (inconclusive or substantiated) during the 12-month study period who were not removed, what percent had a subsequent substantiated allegation within 12 months?

Child Abuse/Neglect Referrals with a Timely Response (2B)

This is a process measure designed to determine the percent of cases in which face-to-face contact with a child occurs, or is attempted, within the regulatory time frames in those situations in which a determination is made that the abuse or neglect allegations indicate significant danger to the child. This data was developed by CDSS. It is a state process measure.

Percent of child abuse and neglect referrals in the study quarter that have resulted in an in-person investigation stratified by immediate response and ten-day referrals, for both planned and actual visits.

Timely Social Worker Visits With Child (2C)

This is a process measure designed to determine if social workers are seeing the children on a monthly basis when that is required. Children for whom a determination is made that monthly visits are not necessary (e.g. valid visit exception) are not included in this measure. This data was developed by CDSS. It is a state process measure. This report is based on CWS/CMS only. (Other data analysis measurements such as the SafeMeasures application may provide different results.)

Of all children who required a monthly social worker visit, how many received a monthly visit?

PERMANENCY OUTCOMES

These measures are designed to reflect the number of foster care placements for each child, the length of time a child is in foster care, and the rate that children re-enter foster care after they have returned home or other permanent care arrangements have been made.

Length of Time to Exit Foster Care to Reunification (3E and 3A)

This is an outcome measure reflecting the percent of children reunified within 12 months of removal of a child from the home. The data was developed by UCB. It is a federal and state outcome measure.

Federal: Of all children who were reunified from child welfare supervised foster care during the 12-month study period, what percent had been in care for less than 12 months?

CHILD & FAMILY WELL-BEING OUTCOMES

These measures are designed to reflect the degree to which children in foster care retain relationships with the family and extended communities with whom they are associated at the time of their removal from their parents.

Siblings Placed Together in Foster Care (4A)

These measures reflect the number of children placed with all or some of their siblings in foster care. The data was developed by UCB. It is a state outcome measure.

For all children in child welfare supervised foster care on the point-in-time, of those with siblings in care, what percent were placed with some and/or all of their siblings?

Foster Care Placement in Least Restrictive Settings (4B)

This measure reflects the percent of children placed in each type of foster care setting. The data was developed by UCB. It is a state outcome measure.

For all children who entered child welfare supervised foster care for the first time (and stayed at least five days) during the 12-month study period, what percent were in kin, foster, FFA, group, and other placements (first placement type, predominant placement type)? What percent of children in child welfare supervised foster care were in kin, foster, FFA, group, and other placements at the specified point in time?

Children Transitioning to Self-Sufficient Adulthood (8A)

These measures are designed to reflect the degree to which children and families receiving child welfare services are receiving the services necessary to provide for their care and developmental needs.

This measure reflects the number of foster children eligible for Independent Living Services who receive appropriate educational and training, and/or achieve employment or economic self-sufficiency. The data was collected by CDSS. This measure includes data regarding youths, ages 16 through 20, who receive services from the Independent Living Foster Care Program. It identifies the number of youths receiving Independent Living Program services, the program outcomes for those youths, and certain client characteristics. This report is limited to a subset population obtained from State of California form 405A. It is a state outcome measure.

This data is based on hard copy reports submitted by counties to the CDSS for the time period covered by the report. These numbers are updated once per year.
